

**221**

---

**DESCRIPTION**

**221** is a biological cleaner and deodorizer containing viable bacteria cultures that digest and remove organic materials that are the source of odors and surface stains. Ideal for restrooms, processing plants, garbage storage areas, food service areas, animal clinics, etc.

---

**FEATURES**

- High concentrations of bacteria blends are extremely effective in breaking down urea in grouting around urinals and toilets
- works to eliminate odors in hard-to-reach areas
- Friendly bacteria multiply upon application to digest and remove odor-producing organics instead of just making them
- Provides residual odor control
- Refreshing cherry scent

---

**HOW TO USE**

• **For Floors:** Add 4-8 oz **221** to each gallon of water needed. Mop floor surface with prepared solution – if residual cleaning/deodorizing action is desired, do not rinse. • **For walls, fixtures, porcelain, urinals, toilets and other hard surfaces:** Add 8-12 oz. **221** for each gallon of water needed and spray directly on the surface to be cleaned/deodorized. Use mechanical action for heavy soiled areas to loosen deposits. Do not rinse if residual cleaning/deodorizing is desired. • **For large areas:** (Pressurized spray equipment can be used.) Dilute 6-8 oz. **221** per gallon of water.
